(54) Title: A STRUCTURAL ASSEMBLY

(57) Abstract: A structural assembly for the con-
struction of buildings and other types of structures
where a covering is fixed to a frame by a removable
seal. The seal is spring biased to secure the cover-
ing against the frame in at least two places. The sys-
tem provides for quick assembly and with the use of
different types of connectors and joiners, different
types of structures of variable design can be formed
for temporary or permanent use.
